### **Purpose/Needs Statement for Series of Seven Meetings**

The Federal and State Records of Decision in December 2000 for the Long-Term Interagency Bison Management Plan for Montana and Yellowstone National Park (IBMP) were the result of extensive deliberation and legal proceedings that yielded an unprecedented agreement amongst federal-state agencies (National Park Service, USDA Forest Service, USDA Animal and Plant Health Inspection Service, Montana Department of Livestock, and Montana Fish, Wildlife and Parks). Under the IBMP, these agencies harness their respective skills and operational resources to work cooperatively within an adaptive management framework to conserve a wild, free-ranging bison population while concurrently protecting against transmission of brucellosis from bison to cattle.

Partner agencies are committed to the adaptive management framework of the IBMP. In keeping with this commitment, the partners have scheduled multiple working meetings between August and December 2008. These meetings will be open to the public with agendas designed so that partner agencies can effectively deliberate on recent recommendations by the US Government Accountability Office; assess the effectiveness and outcomes of IBMP management activities (highlighting winter 2007-2008); and considering prevailing conditions, develop and incorporate short- and long-term adaptive management adjustments to the IBMP for winter 2008-2009 and beyond.

---

### **Goals of the Seven Meetings: for the IBMP Partners...**

1. ... to effectively deliberate on recent recommendations by the US Government Accountability Office;
2. ... to assess the effectiveness and outcomes of IBMP management activities (highlighting winter 2007-2008);
3. ... considering prevailing conditions, to develop and incorporate short- and long-term adaptive management adjustments to the IBMP for winter 2008-2009 and beyond.
